

PROBLEM: Integration of athletes back into society.

SOLUTION: A decentralized fundraising platform for (former) athletes that uses blockchain technology to allow them to easily access capital for their projects. In conjunction with the BizniSport app - which helps them to present and develop themselves on the (non-sport) job market.

HOW IT WORKS: BizniSport blockchain platform is a set of smart contracts running on any EVM compatible chain. Charges a 3% protocol fee on all successful fundraising campaigns.

The BIZS token is used as the governance token:

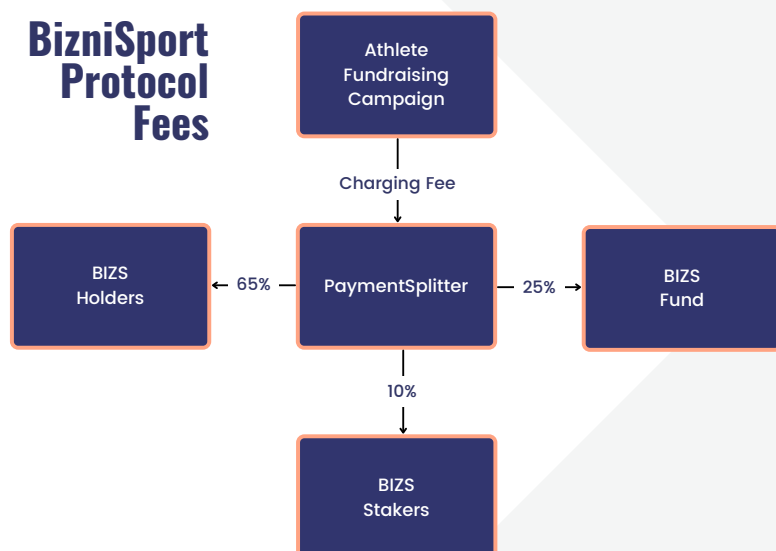

- voting
- profit-sharing
- staking

BIZS token - ERC20
Total supply - 120 million
TGE supply - 9.375.000
Market cap on TGE - \$759.375
